TERMS AND CONDITIONS

This agreement is entered into this _____ day of _____, 2013, by and between Australian Livestock Artificial Breeders (ALAB), and the Mare Owner identified on page 1 above. ALAB agrees to the Embryo Transfer the mare identified on page 2 by the method selected by the owner on page 1 to the stallion selected by the owner listed on page 1.

The undersigned Mare Owner of Lessee (hereafter referred to as Mare Owner) of the above Donor Mare, hereby agrees to the terms of this contract, said terms being as follows:

1. The Mare Owner is responsible for complying with all rules and regulations of the donor mares' breed registry including embryo transfer enrollment of the donor mare prior to the collection of an embryo. The breeding and boarding of donor mare is not included in the embryo transfer fee.
2. All invoice **balances are payable within 30 days of monthly or final invoice**. AFTER 30 DAYS FROM BILLING DATE, A \$25.00 HANDLING FEE AND INTEREST OF 1.8% PER MONTH ON THE OUTSTANDING BALANCE WILL BE ASSESSED. The Mare Owner agrees to pay all costs and reasonable legal fees incurred by ALAB in attempting to collect any outstanding balance.
3. If Owner of donor mare selects ALAB as transfer facility: To pay ALAB Pregnant Recipient Fee of \$2500.00 that is due when recipient mare is 40 days in foal. Included in this fee: (a) No enrollment fee (b) Embryo implantation (c) All medications and treatments necessary for the recipient mare, including but not limited to; injectable progestin's, Regumate, antibiotics and anti-inflammatory medicines until 40 days of gestation (d) Recipient agistment until 40 days of gestation and (e) All recipient pregnancy ultrasounds. The ALAB Pregnant Recipient Fee will be collected as a one time payment at time of recipient mare's departure from ALAB. The donor mare's owner will be responsible for all agistment charges of the recipient after notification from ALAB that mare is 40 days in foal. Once payment is received in full the recipient mare may depart ALAB and she then becomes the responsibility of the donor mare owner, and so all expenses incurred will be the responsibility of the donor mare owner while in owner's possession. Once the recipient has weaned the foal she is to be returned to ALAB in the same condition she left. If the recipient mare should die while under the care of the donor mare's owner, a fee of \$1250.00 will be payable to ALAB. If the recipient mare is alive, but does not return to ALAB before May 31st of the breeding season the mare foaled, the donor mare's owner will be charged \$1250.00 with the assumption that donor mare's owner has elected to purchase the recipient mare from ALAB.
4. In the event multiple embryos are recovered in a single flush, ALAB, reserves the right to transfer all embryos. The Mare Owner has the option to accept or reject the second transfer. If the Mare Owner elects to accept the second transfer an additional \$1100.00 is due when the second pregnant recipient mare is 40 days in foal.
5. ALAB has absolutely no responsibility for any loss of pregnancy after the forty day check confirmed by ALAB. ALAB does not guarantee a live foal. If the recipient mare fails to carry the foal to term or the foal does not survive at birth, ALAB will grant a credit of \$1000.00 for the donor mare's owner to apply towards a Return Embryo Transfer Contract for the following breeding season only. To be eligible for the credit, ALAB must be notified and the mare returned within 30 days of loss.
6. The recipient mare is the property of ALAB. All maintenance related expenses, including mare care, veterinarian expenses (including vaccinations and worming), and farrier expenses, are the responsibility of the Mare Owner during the time that the recipient mare is in the possession of the Mare Owner.
7. If ALAB provides embryo implantation services for Owner provided recipient mares, the Owner will be responsible for all charges incurred for oestrus synchronization including but not limited to; rectal palpations, ultrasounds, prostaglandins, ovulatory agents, progestin's, uterine cultures, intrauterine treatments, antibiotics and board. The Owner of the donor mare will then be charged for embryo flush (as described above in 2.) If an embryo is recovered and processed, the embryo will be transferred into Owner provided recipient for \$700.00. After implanted into the Owner provided recipient, the donor mare's Owner will be responsible and charged for all services and board provided by ALAB on said mare.
8. Mare Owner will indemnify and hold ALAB, its' officers, agents, representatives, and employees harmless from any claims or damages of any kind, including damages and claims of third parties caused by or to recipient mare including claims or damages from or based upon any negligence of ALAB, its' officers, agents, representatives and employees. Mare Owner understands and agrees that ALAB, its' officers, agents, representatives and employees will not be held responsible for accidents, sickness and death to recipient mare and/or foal.

By signing below, I acknowledge and agree to comply with the terms and conditions stated above.
